Summary

Software Engineer with 1.5+ years of experience building scalable web applications using Angular and Node.js, with hands-on experience in REST API development, performance optimization, modular architecture design, and implementing secure authentication using JWT and input validation.

Experience

eSecForte Technologies, Gurgaon Mar 2025 – Present
Software Engineer

- Developed and enhanced features for NxSAM V2, a cloud security assessment platform used for vulnerability analysis.
- Improved UI performance and usability by optimizing Angular components and reducing load time.
- Built reusable and modular components using Angular, improving development efficiency across modules.
- Collaborated with backend teams to integrate REST APIs and ensure seamless data flow.

Projects

Cake House (Bakery Management System) Frontend | Backend
Angular, Node.js, MySQL

- Built a full-stack bakery management system handling product catalog, orders, and inventory.
- Designed REST APIs supporting scalable order processing workflows.
- Implemented role-based admin dashboard with optimized CRUD operations.
- Structured database schema to efficiently manage relational data.

Medical Shop Management System Frontend | Backend
Angular, Node.js, MySQL

- Developed a system for managing medicines, billing, and stock tracking.
- Implemented efficient database design for handling large inventory datasets.
- Automated billing workflows to reduce manual errors and improve efficiency.

PrepBank (Interview Preparation Platform) Live
PHP, MySQL

- Built a platform providing categorized interview questions and quizzes for technical preparation.
- Designed user-friendly UI to improve learning experience and engagement.

Skills

Languages: JavaScript, PHP, Java, C, HTML, CSS
Frameworks: Angular 13, Angular 19, Node.js, CodeIgniter 3
Tools: RabbitMQ, Git, GitHub, Postman, Zoho
Concepts: REST APIs, Authentication (JWT), Validation, OOP, DBMS, System Design Basics

Education

Shri Ram Murti Smarak College of Engineering & Technology 2023 – 2025
Master of Computer Application (MCA) – 81%

Bareilly College, Bareilly 2021 – 2023
Bachelor of Computer Application (BCA) – 73%

Achievements

- Gold Medalist in MCA
- Selected for Earn While Learn Program (Academic Excellence)
- Academic Scholarship for MCA (1st Year)
- Second Prize in Hackathon – Disease Management System
